

4th Workshop on Power Converters for Particle Accelerators

September 23 - 25, 2014

Local Organizer

Robert Lambiase, Chair (BNL)
Caitlin Scholl, Secretary

Scientific Committee

Bouteille, Jean-François
Burnet, Jean-Paul
Eckoldt, Hans-Joerg
Künzi, René
Lambiase, Bob
Rodrigues, Cleber
Visintini, Roberto
Wang, Ju

Venue

Physics Seminar Room, Bldg 510
Brookhaven National Laboratory
P.O. Box 5000, Upton, NY 11973

Registration Information

This year there will be a \$100
Registration Fee. Registration
opens May 1, 2014.

This Year's Main Topic:

Maintenance - Best Strategies and Practices

Power Converters are critical components in the performance and the operation of Particle Accelerators. Meetings - scheduled or informally organized - during International Conferences either on Particle Accelerators or Power Electronics are not the best way for exchanging experiences and ideas. POCPA Workshop is devoted to the specific field of Power Converters for Particle Accelerators aimed to group specialists in this field from the particle accelerator laboratories worldwide for a two-day meeting and to organize a true round-table on selected topics.
